

Pigeon & Corella Cull

Hot Shots Feral & Pest Solutions will be carrying out a non-native Pigeon & Corella cull between: 23-25 October 2026

Pigeon's can be a massive nuisance

The presence of pigeons can result in a range of problems. These can include:

- attracting ticks, cockroaches and rats
- damaging buildings due to the highly corrosive nature of acid in pigeon droppings
- damaging properties by pigeons roosting/breeding in roof spaces, rolled steel joists and inside factory units
- debris from roosting flocks building up, causing gutters and drains to block, damage to roofs and other structures, and creating potential fire hazards
- extensively damaging air-conditioning units and other roof top machinery
- pigeon droppings in/on industrial, commercial, and domestic buildings causing hygiene concerns

Having shooters in our town will provide a good opportunity to reduce the number of some of our other pests. Feral cats, foxes and rabbits will also be targeted over the weekend.

Corellas can be a massive nuisance not only do they eat grain, but they also damage the infrastructure around the town. Due to their large numbers, damage to other areas may also occur, as well as incurring a lot of pressure on our native animals in surrounding bush, when they compete for resources such as food and nesting hollows.

Your safety and the safety of your pets are important to us so please adhere to the following:

- Avoid the areas being targeted: the Trayning Shire Works Depot, the Trayning Hall, Trayning and Districts sporting ground, the Trayning, Kununoppin and Yelbeni tips, the Trayning Golf course and the Trayning Recreation Ground.
- Keep your dog on a leash whilst walking around town.
- Ensure your dogs cannot escape from the yard.
- Keep your cats inside for the whole weekend.

If you require further information please contact the Trayning Shire Office on 9683 1001
